Send me a message with your intent.

EDUCATION

University of Utah, School of Computing
Bachelor of Computer Science
GPA: 3.97

Salt Lake City, Utah
2009 - 2016

PROFICIENT SKILLS

Go, Javascript (Typescript, Web Components, React, Angular), Python, Docker, SQL, Mongo

EXPERIENCE

Qualtrics

Product Team Lead

Provo, Utah
2016-Present

With the success of the Automations product as its primary architect and developer, I now lead a team of engineers who continue to improve this product, grow its use to over 2000 automations and 500 clients, and extend our work to additional products and services within the Qualtrics platform.

Product Engineer

- Due to the high traction of a solutions I developed while on Engineering Services, I was asked to help start a new XM Directory Automations team in Product Engineering.
- Designed, architected, and developed a product for users to configure, schedule, and monitor automated recurring workflows.
- Worked closely with the Product Manager, UX Researchers, and individual clients to turn a previously week-long integration process into a 5-minute user-friendly setup.

Engineering Services

- Worked with world-leading brands to design and develop a variety of productized solutions.
- Led a team of engineers in designing and developing a multi-tenant solution for integrating clients' data seamlessly into Qualtrics XM Directory.

University of Utah

Networked Systems Researcher

Salt Lake City, Utah
2015-2016

- Contributed to research in network management, SDN, and the mobile network.

mDOT

Software Engineer

Salt Lake City, Utah
2015-2016

- Led the development of a web app awarded \$10,000 at a medical innovation competition.
